Easy SVG PRO

Ready in 5 minutes

Quick start in five steps

UnleashWP

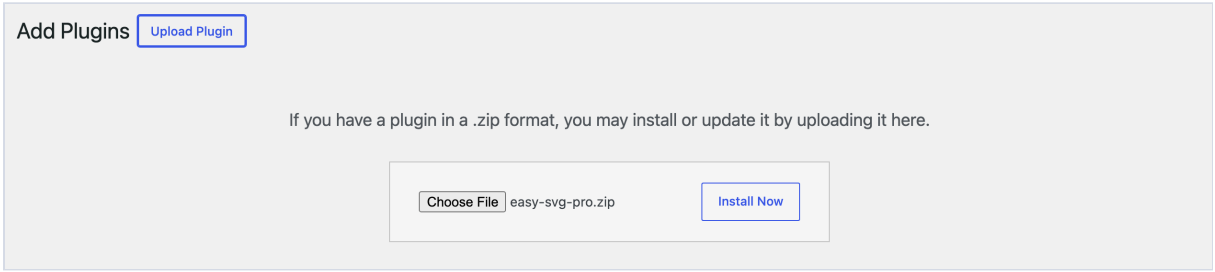

You need a site with WordPress 7.1 or newer, PHP 8.2 or newer and an administrator account.

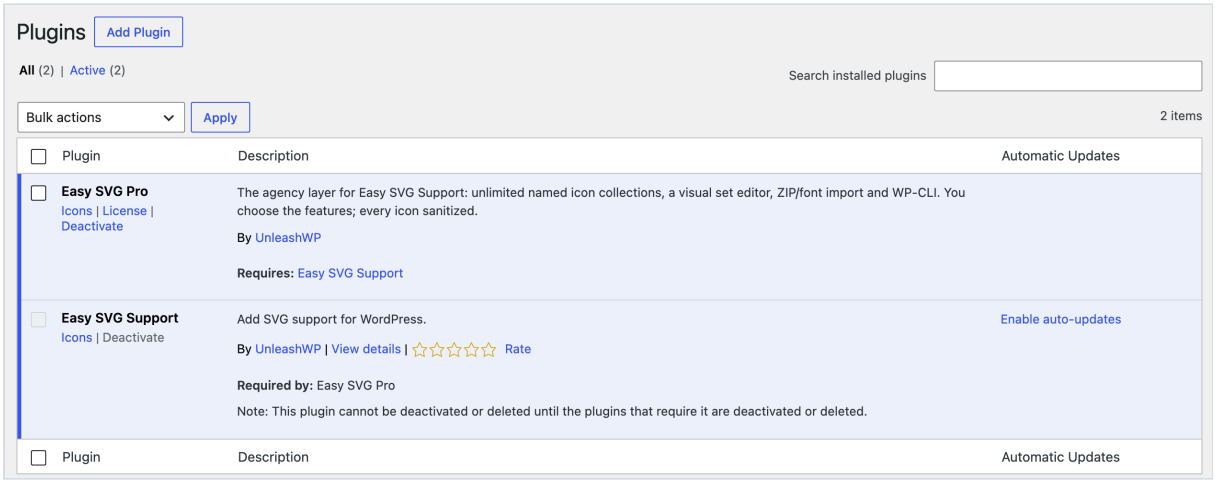

1. Install Easy SVG

Go to **Plugins → Add Plugin**, search for "Easy SVG Support" and click **Install Now**, then **Activate**. The **Easy SVG** menu now shows in the admin sidebar.

2. Install Easy SVG Pro

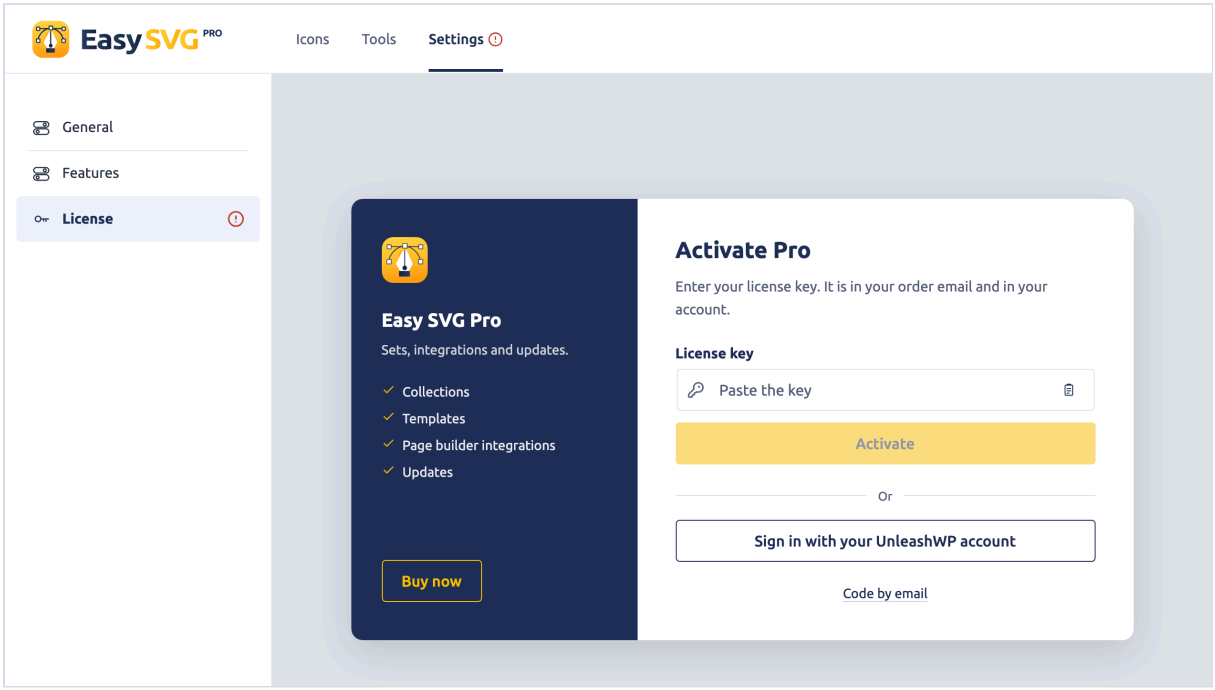

Download Easy SVG Pro in your **UnleashWP account** under **Downloads**. Go to **Plugins → Add Plugin → Upload Plugin**, pick the ZIP and click **Install Now** and **Activate Plugin**. Under **Easy SVG → Settings** you now find the **License** tab.

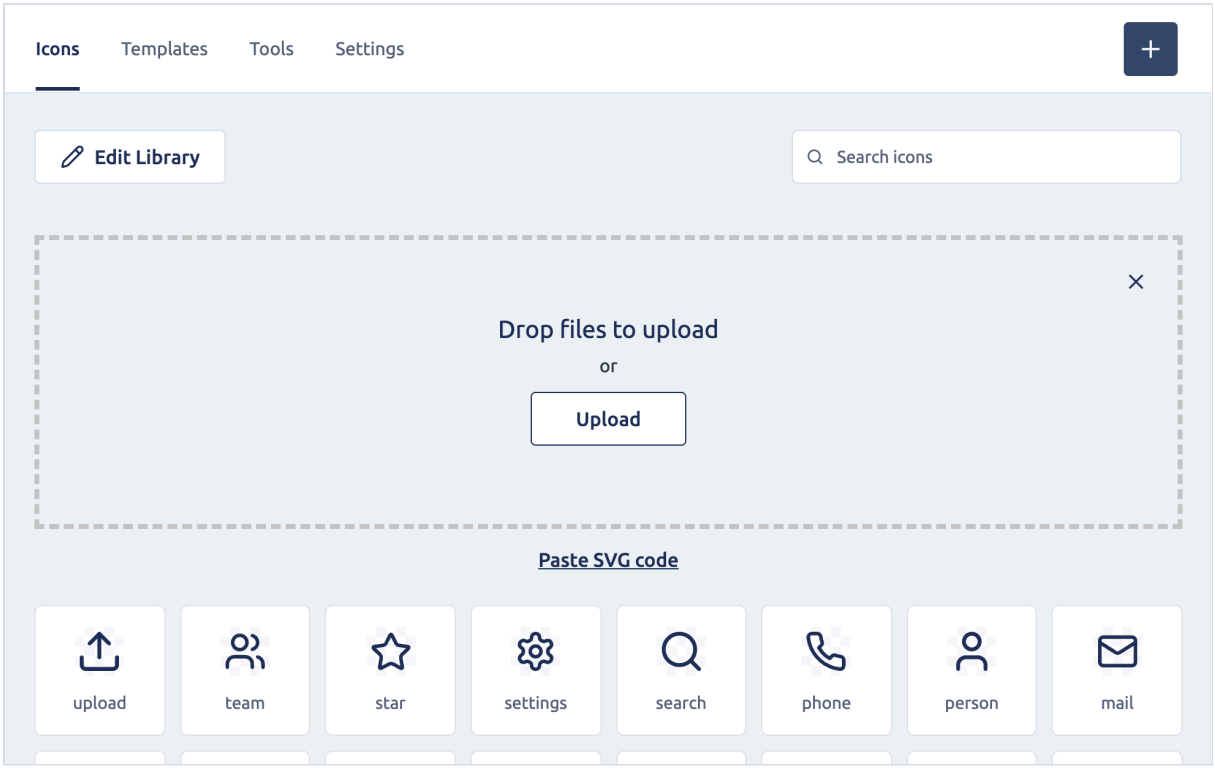

3. Enter your license

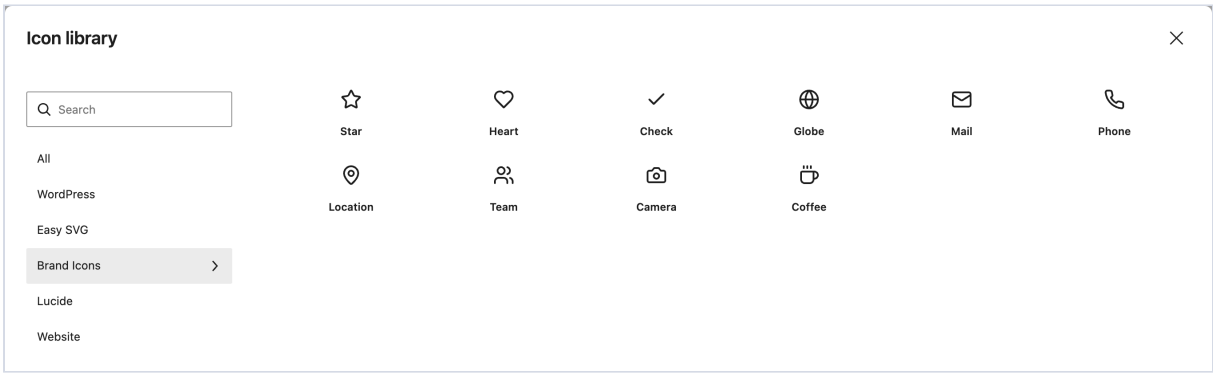

Copy your key in the account under **Licenses**, paste it under **Easy SVG → Settings → License** and click **Activate**. The license shows as **Active** and the Pro screens appear in the **Easy SVG** menu. Updates now come through **Dashboard → Updates**.

4. Your first icon in the Icon block

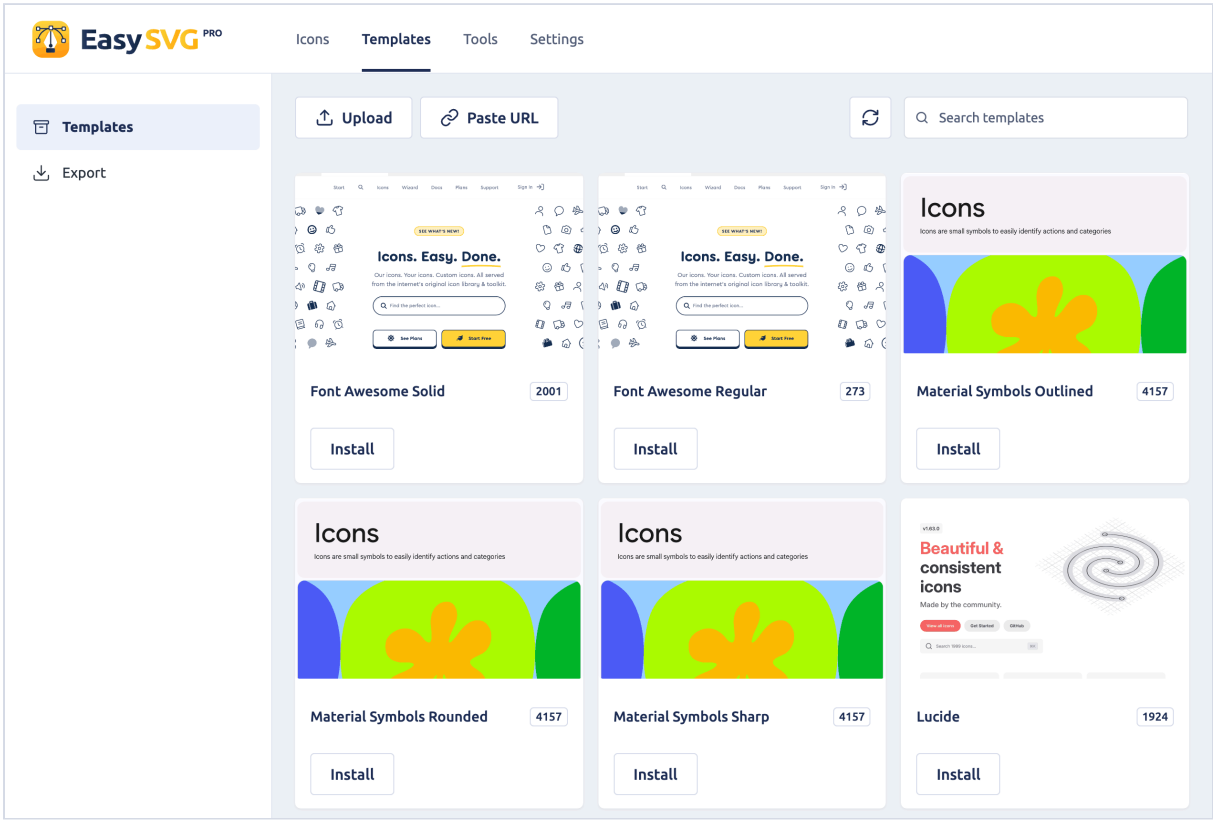

Open **Easy SVG → Icons** and click **Switch on the icon manager**. Click **+** at the top and drop an SVG file in. The icon shows in the grid. On a page, add the **Icon** block and pick your icon.

5. Switch on a template

Under **Easy SVG → Settings → Features**, switch on **Collections**. Open **Easy SVG → Templates** and click **Install and activate Lucide**. The Lucide icons now show in the Icon block.

Next

Sort your sets

One set per client, with a trash.
